

Typical Specifications

Model:	RLX-I
Description:	Unit shall be an aluminum louvered, roof mounted gravity intake ventilator.
Standard Construction:	The unit shall be manufactured of mitered and welded aluminum louvers welded to a heavy gauge aluminum support structure. The removable roof shall be constructed of heavy gauge aluminum and cross broken for added strength. The aluminum base shall have continuously welded curb cap corners for added strength and maximum leak protection. Unit base shall have pre-punched mounting holes for ease of installation. Birdscreen constructed of 1/2" galvanized wire mesh shall be mounted across the entire intake opening perimeter. Intake velocity shall not exceed 500 feet per minute. The unit shall bear a permanently attached nameplate displaying model and serial number of unit for future identification.
Options and Accessories:	Optional accessories shall be provided either factory installed or field installed as detailed in the fan schedules.
Warranty:	Manufacturer's warranty shall apply for a period of 1 year. See warranty certificate for details.
Product:	Unit shall be model RLX-I as manufactured by Soler & Palau USA of Jacksonville, Florida, a division of Soler & Palau Ventilation Group.

Typical Specifications

Model:	RLX-R
Description:	Unit shall be an aluminum louvered, roof mounted gravity relief ventilator.
Standard Construction:	The unit shall be manufactured of mitered and welded aluminum louvers welded to a heavy gauge aluminum support structure. The removable roof shall be constructed of heavy gauge aluminum and cross broken for added strength. The aluminum base shall have continuously welded curb cap corners for added strength and maximum leak protection.
