# EXHAUST & SUPPLY COMMON CURB CAP ADAPTOR FOR MODELS TXB & KSF

Ⓢ Maintains 40" exhaust discharge height when used with a standard 8" high roof curb.

### TYPICAL INSTALLATION

NFPA96 requires a 10 foot minimum distance between the exhaust fan and supply fan intake. The intake extension (optional) provides this clearance. Also required are hinged curb caps (optional) on the exhaust fan and some areas require a vented curb extension.

### NFPA96 ALTERNATE INSTALLATION

Where space limitations absolutely prevent a 10 foot separation from the air intake, a vertical separation may be permitted with the exhaust outlet being a minimum of 3 feet above any air intake located within 10 feet horizontally. **IMPORTANT:** Always check with the authority having jurisdiction to verify local codes and requirements.

### COMMON CURB AND ADAPTOR

The common curb and adaptor allows for mounting both the exhaust fan and supply fans onto one roof opening. Follow the chart below for sizing and ordering common curbs and adaptors.
