

CrewCooler™

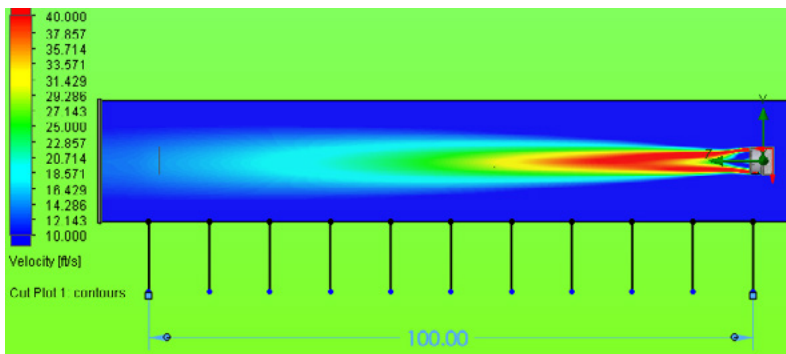

HIGH CAPACITY AISLE AIR CIRCULATOR FAN

COOL WORKERS IN WAREHOUSE AISLES AND KEEP AIR CIRCULATING

Used in commercial and industrial applications like distribution centers, warehouses, manufacturing, poultry houses, and greenhouses, S&P Canada Ventilation Products' CrewCooler™ aisle air circulator fan can move large volumes of air at **low fan speeds and noise levels**. This high capacity belt driven propeller fan is AMCA-licensed for air and sound performance; and it is UL-listed in the U.S. and Canada.

Easy mounting for economical installation. Our fan can be suspended from the ceiling to direct large volumes of airflow toward workers in the aisles or in their work stations.

AIR CIRCULATION THROUGH WAREHOUSE AISLES

S&P Canada Ventilation Products' CrewCooler™ is an aisle circulator fan that keeps air circulating and employees cool in warehouse facilities.
