

# HOODED PROPELLER ROOF EXHAUST FAN HREB-P

S&P USA's latest enhancement to our line of Hooded Propeller Roof Exhaust Fans. The HREB-P uses a glass reinforced polypropylene propeller to create a more efficient and cost effective option for exhaust applications.

- Exhaust air to over 90,000 CFM up to 1" w.g.
- Belt drives permit easy performance adjustments when needed
- cULus 705 Listed
- Applications: Commercial and industrial operations such as manufacturing and assembly plants, warehouses, garages, laundries, and similar buildings
